SUMMARY

Curious, self-driven full-stack developer with a background in linguistics and management. Skilled at breaking down complex problems into practical solutions and taking initiative through all project stages—from user experience to system logic. Communicates openly, proposes thoughtful alternatives and makes balanced decisions. Fluent in five languages and experienced in cross-cultural collaboration, delivering organized, future-ready solutions.

EXPERIENCE

Full Stack Developer

SpectX   📅 06/2025 - Present   📍 Delft, Netherlands

- Built a single-page drone control dashboard using React, Flask and ROS2.
- Integrated Google Maps for interactive mission planning.
- Implemented secure token-based authentication with protected routes.
- Designed and connected a PostgreSQL database with efficient CRUD endpoints.
- Used Vitest for automated testing and Git for version control.
- Strengthened full-stack and robotics skills in Flask, ROS2, and Ubuntu.

Full-Stack Web Developer Trainee

HackYourFuture   📅 09/2024 - 06/2025   📍 Amsterdam, Netherlands

- Developed full-stack applications independently and within agile teams.
- Applied modular architecture and SOLID principles in React for maintainable, scalable code.
- Integrated RESTful APIs to connect client and server.
- Built server logic and routing with Node.js.
- Connected applications to SQL and MongoDB.
- Collaborated in Scrum teams using Kanban and Jira for planning.
- Used Git and GitHub with branches, pull requests, and issues for version control and collaboration.

PROJECTS

FollowMe App

Social platform for organizing in-person events with real-time private chat.
Technology: React.js, Vite, Socket.IO, Node.js, Express.js, MongoDB
Demo / **Code**

- Users can create, join, and manage events, add friends, and chat one-on-one. Features advanced event search with filters by location, category, and title, plus user profiles and event management tools.

KruglaShafa

E-commerce app specializing in handmade furniture
Technology: React.js, Vite, Context API, React Router, Netlify
Demo / **Code**

- Includes product filtering, detailed views, dynamic cart management and pricing. Features infinite scroll and live data from an API for a smooth user experience.

Portfolio

Personal portfolio website showcasing projects
Technology: Next.js, TypeScript, Framer Motion, CI/CD, Vercel
Link

- Features interactive animations
